

300 Cable Tray Unit Price

AI Overview

The unit price for a 300mm cable tray ranges from approximately \$1.2 to \$120 per unit, depending on type, material, and supplier.

Price Overview

Wire Mesh or Steel Cable Trays: Wholesale 300mm trays start at \$1.2 per unit, typically requiring a minimum order of 10 units. These are lightweight, perforated, and anti-rust, suitable for flexible layouts and high-density cable areas.

Medium Duty Metal Trays (3m length): Prices vary depending on supplier and specifications. For example, Trench MDT300TR 300mm medium duty trays are marketed as economical and reliable, though exact pricing requires contacting the supplier.

Heavy Duty Pre-Galvanised Steel Trays (3m length): Premium heavy-duty 300mm trays, such as the Premier Heavy Duty range or Unitrunk KLHR300T, are designed for industrial and commercial use. Prices typically range from \$100 to \$120 per unit, reflecting their robust construction, corrosion resistance, and compliance with standards like BS 61537:2007.

Factors Affecting Price

Material: Pre-galvanised steel or powder-coated steel is more expensive than basic wire mesh.

Duty Rating: Heavy-duty trays for industrial use cost more than medium-duty or light-duty trays.

Length: Standard lengths are usually 2.4m to 3m; custom lengths may increase cost.

Supplier and Location: Prices vary by supplier, shipping, and bulk order discounts.

Recommendations

For budget-conscious projects, wire mesh or standard steel trays are cost-effective. For industrial or outdoor installations, heavy-duty pre-galvanised trays provide durability and compliance with safety standards. Always check for bulk order discounts and shipping costs when planning large installations. By considering these factors, you can select a 300mm cable tray that balances cost, durability, and suitability for your project.
