

8-port industrial switch AOPR

Overview

This 8-port managed industrial PoE++ Gigabit switch includes two SFP+ data ports allowing you to connect extra devices depending on your needs. The growing trend towards networking in the industrial and building sector calls for even more powerful and, at the same time, compact switches due to factors such as the greater use of IP cameras. Our switches can address connectivity needs in a variety of vertical markets. All 8 ports on this unit are PoE+ IEEE 802.3af/at compliant, capable of providing up to 30 watts of PoE power at each RJ45 port. The IES-8P is a rugged, unmanaged 8-port Ethernet switch designed for industrial environments. Its slim design, easy DIN rail mounting, and support for auto-negotiation and Auto-MDI-X make it ideal for fast, plug-and-play.
