

# ALE Distribution Box Size and Dimensions

## AI Overview

Ale distribution boxes typically come in 5L, 10L, and 20L Bag-in-Box formats, with dimensions varying by capacity and manufacturer. Common Ale Box Sizes Ale boxes, often used for brewing or beverage storage, are available in several standard capacities: 5-liter boxes: Compact and portable, suitable for small batches or home use. 10-liter boxes: Medium size, commonly used for parties or small commercial distribution. 20-liter boxes: Larger capacity for commercial or bulk use, often used in pubs or events. These boxes are usually Bag-in-Box® style, where a flexible inner bag holds the liquid and an outer cardboard box provides structure and protection. Some ale boxes also come in printed or plain cardboard, and certain designs include stone-effect cider jugs for aesthetic purposes. Material and Features Material: Most ale boxes use food-grade plastic bags inside a cardboard outer box. Durability: Designed to be leak-proof and easy to dispense. Portability: Lightweight and stackable for storage and transport. Additional options: Some boxes include taps or spouts for easy pouring. Notes on Dimensions While exact length, width, and height can vary by manufacturer, the physical size generally scales with capacity: 5L boxes: Small, roughly 20–25 cm in height and width. 10L boxes: Medium, approximately 25–30 cm in height and width. 20L boxes: Larger, often 30–40 cm in height and width. For precise measurements, it is recommended to consult the specific supplier's product page or datasheet, as dimensions can differ slightly depending on the design and packaging style. These ale boxes are widely used in home brewing, pubs, and commercial beverage distribution, offering a convenient and standardized way to store and serve ale.
