Report Scope This report aims to provide a comprehensive presentation of the global market for Telecom Optical Module, focusing on the total sales volume, sales revenue, price, key companies market share and ranking, together with an analysis of Telecom Optical Module by. The optical module is an optoelectronic device that performs photoelectric and electro-optical conversion. The transmitting end of the optical module converts electrical signals into optical signals, and the receiving end converts optical signals into electrical signals. 62 billion in 2024, the market is projected to reach USD 35.
