

Antistatic flooring cable trays flame retardant stock available

AI Overview

FRP/GRP cable trays with flame-retardant and antistatic properties are available for industrial flooring applications, offering chemical resistance, fire safety, and customizable configurations.

Product Types and Features

FRP (Fiberglass Reinforced Plastic) and GRP (Glass Reinforced Plastic) cable trays are widely used for industrial and commercial installations due to their fire-retardant, corrosion-resistant, and electrically insulating properties. Key features include:

- Flame Retardancy:** Trays are manufactured with fire-resistant resins, meeting international safety standards such as IEC, NFPA, and NEMA, and do not release toxic gases when exposed to fire.
- Antistatic Properties:** Many FRP trays are available with antistatic coatings, reducing the risk of static discharge in sensitive environments.
- Chemical and UV Resistance:** Ideal for harsh environments like chemical plants, coastal areas, and water treatment facilities.
- Mechanical Strength:** Walkable floor-level trays, such as PFLITSCH Floor Trunking, provide high load-bearing capacity and slip resistance (R10 DIN 51130), suitable for areas with foot traffic or industrial machinery.
- Customization:** Available in various sizes, bends, tees, reducers, and perforated or ladder designs, allowing tailored cable management solutions.

Applications

These trays are suitable for:

- Industrial floors and production facilities
- Data centers and power distribution areas
- Chemical plants and offshore installations
- Hospitals, airports, and other sensitive environments requiring fire-safe cable management

Stock Availability

Several suppliers maintain ready-to-ship stock of FRP/GRP flame-retardant trays with antistatic coatings. For example: EAE Electric offers GRP cable trays with flame-retardant, halogen-free materials and minimal maintenance requirements. Kingdom Grating provides FRP/GRP trays with fire-resistant resins, UV resistance, and a full r...

GRP Cable Trays | Corrosion-Resistant & Non

Yes, GRP trays are available with fire-retardant properties and comply with industry standards for fire safety, making them suitable for critical installations.

GRP Cable Tray & Cable Ladders | EAE Electric

Yes, GRP cable trays are made from flame retardant materials and can withstand exposure to fire without igniting. They do not release toxic gases when exposed

Fiberglass Cable Tray

MP Husky Fiberglass Cable Tray is available in both polyester and vinylester resin systems. They are manufactured to meet ASTM E-84, Class 1 Flame Rating and

Fire protection for cables & cable trays | Flamro

Fire protection solutions to protect cables, cable trays and cable systems. Discover our tested cable coatings and fire protection bandages!

GRP Cable Trays

GRP cable trays are normally electrical non-conductive but for those applications with risk explosive atmospheres an anti-static static version is available to order.
