

Belgian wholesale price for cold aisle armored server rooms

AI Overview

Cold aisle containment systems in Belgium typically range from €1,500 to €5,000 per meter of aisle, depending on customization, materials, and installation complexity. Market Overview Belgium's cold aisle containment (CAC) market is mature and driven by high-density computing needs, energy efficiency mandates, and modernization of enterprise and colocation data centers. CAC systems are considered standard for new builds and retrofits, encompassing doors, panels, roofs, and blinds that isolate cold supply air from hot exhaust air, improving cooling efficiency and reducing energy costs. Pricing Factors Wholesale pricing for armored or fully enclosed cold aisle server rooms depends on several factors: Material and Build Quality: Steel or aluminum panels, reinforced doors, and modular ceiling grids increase durability and cost. Customization: Tailored solutions to fit specific rack layouts, ceiling heights, and integrated services (busbars, cable trays) can significantly affect pricing. Installation Complexity: Ceiling-supported vs. ground-supported assemblies, retrofitting existing rooms, and labor requirements influence total cost. Energy Efficiency Features: Systems designed to optimize airflow, reduce PUE, and enable free cooling can justify higher upfront costs but offer ROI within 12-18 months through energy savings. Scale: Larger aisles or full data center deployments benefit from economies of scale, reducing per-meter costs. Typical Cost Ranges Standard Cold Aisle Panels: €1,500-€2,500 per meter for basic steel or aluminum panels with standard doors and ceiling tiles. Armored or High-Spec Containment: €3,000-€5,000 per meter for reinforced, modular, or fully customized solutions with integrated services and advanced airflow management. Turnkey Server Room Solutions: Complete armored server rooms, including containment, flooring, a...
