

CIF Price of 48V Power Storage Cabinets Exported from Nigeria

AI Overview

The CIF price of 48V power storage cabinets exported from Nigeria typically ranges from \$18,000 to \$35,000 for 50kWh systems, depending on specifications, shipping, and insurance costs.

Export Price Overview In Lagos, Nigeria, energy storage cabinets, including 48V systems, are priced between \$18,000 and \$35,000 for 50kWh units, influenced by battery capacity, manufacturer, and system features such as hybrid integration and intelligent energy management. Smaller 48V cabinets with lower kWh ratings (e.g., 5kWh–40kWh) are available from local manufacturers and suppliers, often with competitive pricing for bulk orders.

CIF Calculation The CIF (Cost, Insurance, Freight) value includes:

- FOB (Free on Board):** The product cost at the Nigerian port.
- Freight:** Shipping cost from Nigeria to the destination port.
- Insurance:** Typically 0.5% of the sum of FOB and freight.

Formula: $CIF = FOB + Freight + Insurance$

For example, if a 48V cabinet costs \$20,000 FOB, and shipping to the destination port is \$2,000, insurance would be approximately \$110 (0.5% of \$22,000), making the CIF value \$22,110.

Import Duties and Taxes When importing, the CIF value forms the basis for customs duty and taxes:

- Import Duty:** 0–50% depending on the HS code of the product.
- Surcharge:** 7% of import duty.
- CISS:** 1% of FOB value.
- ETLS:** 0.5% of CIF value.
- VAT:** 7.5% of (CIF + Import Duty + Surcharge + CISS + ETLS).

Port Charges: Approximately ₦150,000 for handling and clearance.

Practical Considerations Shipping and insurance costs vary by destination, transport method, and volume. CIF prices are influenced by cabinet capacity, battery type (lithium-ion vs. lead-acid), and additional features like hybrid solar integration or intelligent energy management. For precise CIF pricing, it is recommended to request a quotation from Nigerian suppliers including freight and insurance to the target port...
