

Cable Management Stand Weight

AI Overview

Cable management stands vary widely in weight, from around 16.5 kg (36.5 lbs) for heavy-duty industrial stands to approximately 15 lbs for under-desk organizers. Heavy-Duty Industrial Cable Stands Heavy-duty cable management stands, such as the CableSafe® Heavy Duty Cable Stand, are designed for industrial environments like shipyards, refineries, and construction sites. These stands can support up to 250 kg (550 lbs) of cables and hoses and reach heights of up to 2.95 meters (9.7 feet). The weight of a single stand is approximately 16.5 kg (36.5 lbs), and they are made of powder-coated steel for durability and stability. Additional reinforcement with sandbags is possible in windy conditions. Construction and Tower Stands Construction-oriented cable management stands, like the MAX Construction Cable Management Tower Stand, feature adjustable telescopic poles up to 2.5 meters and are designed to safely carry multiple mains leads and hoses off the ground. While the exact weight is not specified, these stands are generally comparable to other heavy-duty industrial models in terms of portability and robustness. Under-Desk Cable Management For office or home use, under-desk cable management trays are much lighter. For example, a 25-inch metal cable tray can hold up to 15 lbs of cables and is designed to attach to desks without drilling. These trays are made of sturdy metal with mesh construction for ventilation and dust reduction, and they weigh significantly less than industrial stands, making them easy to install and reposition. Summary Industrial heavy-duty stands: ~16.5 kg (36.5 lbs), support up to 250 kg (550 lbs), height up to 2.95 m Construction/tower stands: Adjustable height up to 2.5 m, weight similar to heavy-duty stands Under-desk organizers: ~15 lbs, designed for home or office use, supports moderate cable loads Choosing the right cable management stand depends on the environment, load requirements, and portability needs. Heavy-duty stands are ideal for industrial sites, while lighter under-desk trays are suitable for office setups.
