

Cable tray to top plate

Overview

The main cable tray connection methods include splice plates, bolted connections, quick connect systems, fish plates, clamps, and welding. Choosing the right one depends on project conditions, load. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Wire Basket Overhead Cable Tray Routing System contributes to effective space utilization. Establishing partnerships with customers is a top priority for OBO, and OBO staff are available to support customers in all aspects of their projects, including products, installation and planning advice. It connects two trays together and ensures a strong joint. These plates are used in industries, commercial buildings, and large projects. A reliable manufacturer always focuses.
