

Cable tray to work station

AI Overview

Cable trays provide a flexible and organized way to route power and data cables from under the desk to your workstation, improving safety and workspace aesthetics.

Types of Cable Trays

- 1. Flexible Cable Trays** The Flex cable tray is designed to adapt to various desk shapes, including straight, corner, or irregular desks. Its modular and flexible design allows for easy routing of cables and power strips, keeping them neatly stowed and reducing tripping hazards. It can be quickly attached under the desk and is made from durable materials for long-term use. For enhanced functionality, it can be combined with a slim cable chain to route cables from the floor to the desk efficiently (Actiforce) .
- 2. Clamp-On Under Desk Trays** Clamp-on trays, such as the Mount-It! model, attach securely to the back of most desks without drilling. They feature an open design for ventilation, easy access to cables, and cut-outs for routing cords. These trays are ideal for dual-monitor setups, docking stations, or multiple electronics, providing a sturdy solution for power strips and surge protectors while maintaining a professional appearance (Mount-It!) .
- 3. Self-Adhesive or Screw-Mounted Trays** Some trays offer self-adhesive or screw-mounted installation, allowing for a no-drill setup. These trays can hold multiple cables and even two power strips, offering flexible installation options and upgraded routing holes for better organization. They are suitable for users who want a clutter-free workspace without permanent modifications to their desk (PCPartsGeek) .
- 4. Hinged or Universal Kits** The Steelcase Universal Cable Management Kit provides a hinged tray that flips down for easy access to cords. It accommodates multiple power outlets and USB ports, ideal for height-adjustable desks or workstations with multiple monitors. The hinged design allows for convenient access while keeping cables compact and organized (Steelcase) .

Installation Tips

Plan cable routes: Identify where power and data cables need to run from the floor or wall to your workstation. Choos...
