

# Charging Pile Distribution Box Belize Manufacturer

## AI Overview

Belize currently has limited local manufacturers for charging pile distribution boxes, but international suppliers can provide customized, weatherproof solutions suitable for EV infrastructure.

**Local Options in Belize** While Belize does not have a widely recognized manufacturer specifically for EV charging pile distribution boxes, there are companies dealing with outdoor electrical distribution and temporary distribution boxes that could potentially supply or customize solutions for EV charging needs. These include cable earthing connection boxes and control panel enclosures with IP66/IP67 weatherproof ratings and stainless steel construction, which are suitable for outdoor installation in tropical climates like Belize.

**International Suppliers** Several international manufacturers offer charging pile protection and distribution boxes that can be shipped to Belize:

- GDElectrical (China):** Provides waterproof charging pile protection boxes that can be customized according to drawings or specifications. These boxes are designed for outdoor use and protect internal components from environmental hazards.
- XTECK Power (China):** Offers EV charger enclosure boxes made from ABS, polycarbonate, aluminum alloy, or stainless steel. These enclosures are weatherproof, UV-resistant, and can be customized for single or double-gun charging piles. They also support integration with Wi-Fi, Ethernet, RFID, and OCPP protocols for smart charging management.

**Considerations for Belize** When sourcing charging pile distribution boxes for Belize, consider:

- Weatherproofing:** Boxes should withstand rain, humidity, and UV exposure.
- Material:** Stainless steel or reinforced plastic enclosures are recommended for durability.
- Customization:** Ensure the box can accommodate the number of conductors and charging pile type (AC or DC).
- Compliance:** Verify that the enclosures meet local electrical safety standards.
