

East Africa Data Center Cable Management System Brands

AI Overview

Key cable management solutions in East Africa include System Star Technologies, Device42, Sunbird, ROUTEMASTER OSP, Bentley Raceway, 3-GIS, and PEACE Cable. Physical Cable Management Providers System Star Technologies supplies high-quality cable management systems suitable for data centers, offices, industrial facilities, and telecom networks across Kenya, Uganda, Tanzania, Ethiopia, Rwanda, and South Sudan. Their products are made from durable PVC, steel, or aluminum, offering modular and flexible designs for easy installation, scalability, and improved safety in cable routing. These systems are ideal for organizing power and network cables, protecting electrical wiring, and supporting maintenance and upgrades. Software and DCIM Solutions Device42 is a full-stack agentless discovery and dependency mapping platform that helps data center operators visualize and manage their IT infrastructure, including cabling, network devices, and applications. It provides real-time insights, dependency mapping, and optimization tools for hybrid IT environments. Sunbird DCIM focuses on monitoring and operations, enabling better management of assets, power, environmental conditions, and capacity in data centers. ROUTEMASTER OSP specializes in managing outside plant fiber and FTTH networks, integrating GIS support for detailed geographical visualization and real-time monitoring of network equipment. Bentley Raceway and Cable Management offers a 3D design environment for planning, designing, installing, and maintaining complex cabling and raceway systems, with parametric design tools and reporting capabilities. 3-GIS provides geospatially driven solutions for planning, designing, and managing fiber networks, offering real-time data and automation for faster service activation. Regional Connectivity and Cable Systems PEACE Cable is a major submar...
