

Ethiopia tray-type cable trays available now

AI Overview

Tray-type cable trays in Ethiopia are widely available in ladder, perforated, and trough designs, made from galvanized steel, stainless steel, or FRP, and comply with local safety and structural standards.

Types and Materials

Tray-type cable trays in Ethiopia include:

- Ladder Trays:** Open design with side rails and rungs, ideal for heavy-duty industrial applications and easy cable installation.
- Perforated Trays:** Solid base with perforations for ventilation and drainage, suitable for medium loads and environments requiring corrosion resistance.
- Trough Trays:** Fully enclosed or semi-enclosed, providing protection for sensitive cables from dust or mechanical damage.

Materials commonly used:

- Hot-dip Galvanized Steel:** Offers excellent corrosion protection for most Ethiopian climates.
- Stainless Steel (316L):** Recommended for coastal or high-humidity areas due to superior corrosion resistance.
- FRP (Fiber Reinforced Plastic):** Fireproof and acid-resistant, ideal for chemical plants or high-risk environments.

Technical Considerations

When selecting tray-type cable trays in Ethiopia, consider:

- Load Capacity & Span:** Industrial trays typically support 100–500 kg/m with spans of 3–6 meters.
- Corrosion Protection:** Minimum 80µm zinc coating for galvanized trays; powder-coated aluminum or stainless steel for high-humidity zones.
- Fire Safety:** Compliance with ET-NFC 2015 fire codes; Class A fire rating is required for public buildings.
- Standards Compliance:** ESA SES 501:2015 for structural safety and IEC 61537 for grounding continuity.

Suppliers in Ethiopia

Several local and international suppliers provide tray-type cable trays:

- NAHMA Precision Metal Products:** Offers ladder, perforated, and custom cable trays in Addis Ababa.
- Cable Tray Manufacturers Ethiopia:** Supplies galvanized steel, stainless steel, and FRP trays with modular designs and customizable fittings.
- Cable House:** Provides tailored solutions...
