

Fiber Optic Cable Splice Box Price Chart

AI Overview

Fiber optic splice boxes typically range from \$10 to \$200 or more depending on fiber count, type, and features.

Price Ranges by Fiber Count and Type

- 12 to 24-core splice boxes: Generally priced between \$10 and \$50 for standard wall-mounted or small outdoor enclosures.
- 48 to 72-core splice boxes: Mid-range boxes suitable for larger installations cost around \$50 to \$120.
- 96 to 144-core splice boxes: High-capacity boxes for commercial or FTTH networks can range from \$120 to \$200+, depending on material quality and additional features like weatherproofing or pre-installed trays.

Factors Affecting Price

- Material and Build Quality:** Outdoor-rated boxes with UV-resistant or waterproof enclosures are more expensive than indoor wall-mounted boxes.
- Fiber Type Compatibility:** Single-mode or multimode compatibility, as well as LC, SC, or MPO connectors, can influence cost.
- Included Accessories:** Some boxes come with splice trays, adapters, or cable management features, which can increase the price.
- Volume and Supplier:** Bulk purchases or wholesale suppliers often offer lower per-unit prices, while retail platforms like Amazon may have higher individual prices.

Additional Considerations

- Splicing Labor Costs:** Fusion splicing labor typically costs \$50–\$150 per splice, not including the splice box itself.
- Equipment Costs:** Fusion splicers range from \$3,000 to \$15,000, cleavers \$500–\$2,000, and OTDR testers \$5,000–\$20,000, which are relevant if planning in-house splicing.
- Maintenance and Expansion:** Choosing a splice box with extra capacity or modular trays can reduce future upgrade costs.

By considering fiber count, enclosure type, and included accessories, you can select a splice box that balances cost and functionality for your network deployment.
