

Home Fiber Splitter Networking Huawei

Overview

Huawei's FTTR solution extends fibers to rooms and provides various gigabit Wi-Fi 6 master/slave FTTR units, all-optical components, and optical cable routing tools, allowing users to enjoy stable gigabit Wi-Fi experience in every corner of the home. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3.0. In the earliest FTTH solution, ODN 1.0 optical splitting was used for. With the rapid growth of bandwidth-hungry services such as 4K, 8K, VR, and HD video, the fiber to the home (FTTH) industry has attracted wide attention from operators, and is now in a period of explosive growth. This splitter exemplifies the convenience of a plug-and-play device that requires no field splicing, offering immediate functionality upon installation. Plug-and-Play Simplicity: Ready to use out of the box. Huawei Technologies Co Ltd. launched what it claims is the industry's first intelligent optical splitter for passive optical networks (PON) at the FTTH Conference in London last week.
