

Horizontal Optical Cable Price

AI Overview

Horizontal optical cable prices vary widely depending on type, length, and supplier, typically ranging from a few dollars per meter for standard bulk cables to higher prices for specialized or high-performance variants.

Price Overview

The cost of horizontal optical cables depends on several factors:

- Cable Type:** Single-mode cables, used for long-distance high-bandwidth applications, are generally more expensive than multi-mode cables, which are suitable for shorter distances like LANs and data centers.
- Length and Quantity:** Bulk purchases or longer cable runs reduce the per-meter cost. Wholesale suppliers often provide significant discounts for large orders.
- Material and Performance:** High-quality glass fiber cores, low-loss connectors, and armored or plenum-rated cables increase the price.
- Supplier and Region:** Prices vary between international suppliers, online marketplaces, and OEM factory distributors. Direct factory sourcing can offer lower prices and customization options.

Typical Price Ranges

- Wholesale Bulk Cables:** On platforms like Alibaba or Made-in-China, prices can start as low as \$0.50–\$2 per meter for standard multi-mode horizontal optical cables.
- Retail or Branded Cables:** On Amazon or electronics distributors, prices for pre-terminated or high-performance cables can range from \$5 to \$20 per meter, depending on specifications and connectors.
- Custom or High-Spec Cables:** For specialized applications, such as low-latency or armored cables, prices may exceed \$30 per meter, especially when ordered in small quantities.

Tips for Cost Optimization

- Buy in Bulk:** Ordering longer lengths or multiple units reduces per-meter cost.
- Compare Suppliers:** Check multiple distributors like Alibaba, Octopart, RS HK, and Made-in-China for competitive pricing.
- Consider OEM Options:** Factory-direct orders allow customization and often lower prices for large-scale projects.
- Check Specifications:** Ensure the cable meets your performance needs; over-specifying can unnecessarily increase costs.

By evaluating these factors, you can select horizontal...
