

How many years is the warranty for a PoE switch

AI Overview

PoE switch warranties typically range from 1 to 5 years, depending on the manufacturer and product line. Manufacturer-Specific Warranty Information

Cisco: Warranty periods vary by product and can be determined using Cisco's Warranty Finder tool. Some hardware warranties, such as the Cisco Limited 5 Year RFR (Return for Repair), provide up to 5 years of coverage for eligible devices.

Ubiquiti: Through the UI Care program, qualifying devices can receive up to 5 years of replacement protection, including next-business-day replacement and prepaid shipping.

Velolan: Standard PoE switches from Velolan are covered for defects in materials and workmanship, with warranties extending up to 3 years after the End-of-Life (EOL) announcement for discontinued products.

TP-Link: Business-class PoE switches purchased after September 1, 2023, have a limited lifetime warranty for the original purchaser, while discontinued or end-of-life products are covered for 5 years from the EOL date.

PoESuperstore (LINKPOWER™ LPS brand): Outdoor PoE switches are warranted against defects in materials and workmanship for 3 years from the date of purchase, applicable only to the original retail purchaser.

Key Considerations: Warranties are generally non-transferable and apply only to the original purchaser. Coverage typically includes defects in materials or workmanship, but excludes damage from misuse, environmental stress, or unauthorized modifications. Some manufacturers offer extended or enhanced warranty programs that provide faster replacement or additional support services. Discontinued or end-of-life products often have limited warranty periods that may differ from active product lines. In summary, while most PoE switches come with a 3-year standard warranty, certain brands and programs can extend coverage up to 5 years or a limited lifetime...
