

How to install a fiber optic box when upgrading your home

Overview

If your ISP doesn't require a technician to set up your connection, these are the steps to self-install fiber internet: Locate your fiber network terminal. Connect the fiber terminal to the network box. Connect your device to the network. In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage. Fiber transmits data using light signals through glass strands, delivering faster speeds and lower latency than cable or DSL connections that rely on. Our fiber optic installation process covers everything from planning and preparation to termination and testing. But how does it work?

Keep reading to find out.
