

How to install the concealed door of the distribution box grille

AI Overview

A concealed door in a distribution box grille can be installed by embedding the box in the wall, aligning it precisely, and fixing the grille with screws while finishing the perimeter for a seamless look.

Step 1: Prepare the Wall Opening Reserve a hole in the wall approximately 20mm larger than the distribution box dimensions to allow for plastering and finishing. The depth of the opening should equal the thickness of the distribution box plus the plaster layer. Ensure the wall surface is clean and level before embedding the box.

Step 2: Embed and Fix the Distribution Box Place the distribution box into the reserved opening, ensuring it is horizontal and vertical, with vertical deviation not exceeding 3mm. Fill the gap between the box and the wall with concrete or suitable filler to secure it firmly. Apply anti-corrosion paint to contact surfaces if the box is metallic.

Step 3: Install the Concealed Grille or Door Position the grille or door so that its perimeter aligns flush with the wall or ceiling. Fix the grille using plasterboard screws through the pre-drilled holes in the grille perimeter, spacing screws no more than 250mm apart. For grilles with plenum boxes, use threaded rods to adjust height and ensure the lower edge is level with the wall or ceiling.

Step 4: Finishing Plaster over screw holes and smooth the surface with fine paste to achieve a seamless, concealed appearance. Ensure the grille or door can be manually detached for maintenance, inspection, or filter access without damaging the wall finish.

Step 5: Electrical Connections and Safety Connect power lines to the appropriate terminals, ensuring neutral (N) and protective earth (PE) lines are correctly busbar-mounted and numbered. Install fuses or breakers vertically and label each circuit clearly for future maintenance. Perform insulation resistance tests and visual checks before powering on.

Step 6: Maintenance Considerations Ensure the c...

Installation instructions

Where the plenum boxes are fitted independently of the grille, it is not necessary to fix them together. The plenum box should be fixed to the ceiling slab and the grille to the plasterboard.

Quick installation tips for modular distribution boxes

Today, I want to walk you through a stress-free installation journey. I'll share not just textbook instructions, but the kind of practical wisdom that only comes from hands-on experience.
