

Latest News on Fiber Optic Cable Procurement in 2024

AI Overview

China's major telecom operators launched large-scale centralized procurement projects in 2024, distributing tens of millions of core kilometers of fiber optic cables to multiple suppliers. China Unicom 2024 Centralized Procurement China Unicom announced its 2024 optical cable centralized procurement project, awarding contracts to 15 optical fiber and cable companies for a total of 65.7859 million core kilometers of optical cable. Although the project was issued at the end of 2024, the bid opening was scheduled for early 2025, with product delivery planned shortly thereafter. This initiative is considered the first centralized procurement project of optical fiber and cable by the headquarters of China's three major telecom operators in 2025, marking a significant boost for the domestic fiber optic industry and signaling strong market demand for the upcoming year. China Telecom 2024-2025 Procurement China Telecom also launched a centralized procurement project for trunk fiber optic cable lines and supporting equipment for the 2024-2025 period. The project includes optical cables, fiber optic splice closures, and silicon core pipes for primary trunk fiber optic cable line projects. This procurement aligns with the commercial rollout of 400G backbone networks, with plans to implement 400G QPSK ROADM networks and future-proof the infrastructure for 800G/400G multi-rate hybrid transmission, enabling flexible upgrades and high-speed service delivery. Market Context and Trends The global fiber optic cable market was valued at USD 13 billion in 2024 and is projected to grow at a CAGR of 10.4% to USD 34.5 billion by 2034. The growth is driven by 5G network deployment, data center expansion, and increasing broadband penetration. Central core fiber optic cables, widely used for FTTH and FTTB implementations, are expected to reach USD 4.19 billion by 2034, reflecting ri...
