

Making cable trays without nails

Overview

For sustainable DIY cable management, consider using recycled cardboard to create custom organizers, bamboo for stylish trays and clips, or jute and hemp twine to reduce plastic waste. Upcycled fabric pouches from old clothes add both function and flair, while natural wood clips. The market is flooded with a variety of nail-free solutions for attaching cables to walls. The choice of solution depends on the type of cable, the weight it can support, the type of wall, and personal preference. You may also want to know: Are Bing and Yahoo the Same?

- Are Sony and Murata Partners?

Tired. Cables have a natural desire to tangle when two or more are laid down together, so the cabling under our office desk was spaghetti junction. I even placed a folding table under the desk to put some of the cables on—to keep them off the floor and make cleaning under the desk easier—but they just. A quick and practical DIY cable tidy tray built from scrap wood and a magnet strip. Learn measurements, tools, and step by step mounting to boost organization without breaking the bank.
