

Maximum load of outdoor lighting distribution box

Overview

With the maximum carrying capacity of 6000W, it can be applied to high mast lighting system combined with outdoor lighting fixtures such as sports light, flood light, etc. Our distribution box serves as a connection and branching box which can be used outdoors. It performs well in wet locations with the water-proof rating of IP66. Unlike standard junction boxes, these distribution systems must. If you're planning an outdoor electrical installation—whether for solar arrays, pool equipment, or landscape lighting—understanding outdoor electrical box with breakers is essential for both safety and code compliance. These specialized enclosures combine weatherproof protection with circuit. Lucy Electric's range of low voltage outdoor cut outs and distribution boxes is engineered for durability, safety, and ease of installation in demanding environments. It protects cables and devices from overload, disconnects circuits in the event of a fault and thus guarantees maximum safety.
