

# NEMA4X Branded Optical Fiber Cable Fault Locator

## Overview

The Visual Fault Finder VFF5 projects a highly visible laser light source into fiber optic cabling. This is used to check continuity, locate breaks, poor mechanical splices and damaged connectors. Continuous and flashing modes make for easier identification. Compatible with FS offers 1mW, 1.3mW, 10mW, 20mW and 30mW visual fault locator for locating faults and verifying continuity and polarity. Spring into certainty with smarter testing and maximum savings. Our tools are indispensable for professionals requiring accurate fiber testing. Highly efficient pocket-size visual fault locator—the ideal complementary tool for any fiber-testing technician.
