

Network rack depth 400

AI Overview

400 mm deep network racks are compact, wall-mounted cabinets suitable for small to medium-scale networking, patch panels, and edge equipment installations. Overview Network racks with a 400 mm depth are designed for environments where space is limited, such as home offices, small businesses, CCTV setups, or comms rooms. They typically support 19-inch standard rack equipment and offer features like lockable doors, removable side panels, and ventilation for efficient airflow. Key Features Dimensions and Capacity: Common options include 6U, 9U, and 12U heights, with widths around 570 mm and depths of 400 mm. Construction: Most cabinets are made from 1.2–1.5 mm thick steel with powder-coated finishes for durability. Doors and Panels: Front doors are often vented glass with locks, while side panels are removable and lockable for easy maintenance. Load Capacity: Depending on the model, wall-mounted 400 mm racks can support 70–200 lbs (32–90 kg) of equipment. Cable Management: Many cabinets include cable entry points with brushes at the top and bottom, allowing organized routing of network cables. Compliance: Some models comply with RoHS, REACH, and EU environmental directives, ensuring safe use in professional environments. Popular Models Excel Environ WR400: Available in 6U and 12U, black, wall-mounted, fully welded frame, front-vented glass door, lockable side panels, ideal for patch panels, switches, and small networking setups. APC NetShelter WX 9U: Wall-mountable, 400 mm deep, reversible door, optional NetBotz monitoring, suitable for retail, healthcare, and educational facilities. RS PRO 6U Rack: Wall-mounted, 400 mm depth, glass door with lock, side panels openable from inside, supports small to medium networks. Advantages of 400 mm Depth Space Efficiency: Ideal for tight installations where floor space is limited. Flexibility: Supports standard 19-inch equipment while allowing cable management and ventilation. Security: Lockable doors and panels protect sen...
