

Niton Handheld Spectrometer Price

AI Overview

The Thermo Scientific Niton XL5 Plus handheld XRF analyzer is priced at approximately USD \$13,190 for a new unit. The Niton XL5 Plus is a lightweight, portable XRF spectrometer designed for fast and accurate elemental analysis in the field, capable of detecting lightweight elements and analyzing metals, alloys, and geochemical samples. This model is widely used in industrial, environmental, and mining applications due to its versatility and high performance.

Pricing Details

New Units: The current listed price for a new Niton XL5 Plus is \$13,190 USD. Prices may vary slightly depending on the distributor, region, or additional accessories included.

Used or Refurbished Units: Used Niton handheld XRF analyzers are available on platforms like eBay, often at a discounted rate compared to new units. Savings can be significant, sometimes up to 70% off, depending on the model and condition.

Leasing or Rental Options: Some distributors offer leasing or rental programs, which can spread the cost over several months or years, making it more accessible for short-term projects or budget-conscious buyers.

Additional Considerations

Accessories and Software: Pricing may vary if additional software, calibration kits, or protective cases are included.

Regional Licensing: Some regions may require specific licensing for XRF analyzers, which can affect the final purchase cost.

Support and Training: Thermo Fisher and authorized distributors often provide training, support, and warranty options, which may be included in the purchase price or offered separately. For the most accurate and up-to-date pricing, it is recommended to contact authorized Thermo Fisher distributors or check online retailers that specialize in scientific instrumentation.
