

OPGW optical cable from France

Overview

AFL EMEA's OPGW (Optical Ground Wire) fibre optic cables, designed for aerial installations in telecom, energy, and utility networks. Offering robust performance and protection in harsh environments. Prysmian never has a pre-determined answer to a challenge – instead. OPGW is a dual functioning cable performing the duties of a ground wire and also providing a patch for the transmission of voice, video or data signals. The cable is. OPGWatch® monitoring system detects events in real time across the overhead lines using only one fibre from installed OPGW cable. Video Through the careful assessment of your exact needs. OPGW is primarily used by the electric utility industry, placed in the secure topmost position of the transmission line where it “shields” the all-important conductors from lightning while providing a telecommunications path for internal as well as third party communications.
