

Optical Cross-Connector Cable Finding Tool

Overview

The Visual Fault Finder is a visible laser light source used to check continuity, locate breaks, poor mechanical splices and damaged connectors in fibre optic cabling. 9-in-1 Cable Testing Multifunctionality: Combines 9 key functions including wire mapping, digital cable tracing, port flashing, cable length measurement, PoE checking, crimping test, OPM (optical power meter), VFL (visual fault location), and NCV (non-contact voltage) test, streamlining network. Fiber optical thermal stripper M9 is suitable for 1-48 cores, compatible bare fiber/bundle and ribbon fibers, Dual heating mode and 8-level temperature regulation. Automatic heating peeling tool This product has sustainability features recognized by trusted certifications. Contains at least 50%. Choose fiber optic accessories and tools for your next installation, including access tools, tool kits, polishing film, cleaning accessories, and replacement parts. Find your closest global distributor. Designed and engineered for efficiency, accuracy, and reliability during cable and connector inspections, they identify defects and anomalies with utmost clarity and confidence.
