

Power Distribution Box Specifications AP

Overview

The APC Metered Rack PDU distributes reliable power within a rack through a single input and multiple output receptacles. The AP8841 offers real-time remote monitoring of connected loads and user-defined alarms to help prevent circuit overloads that can cause accidental power loss. Boxes are produced using recycled material,* which reduces carbon footprint. reliable information about the products ABB takes a company-wide approach to circularity. We aim to innovate toward new circular business models by cutting waste, increasing. Distribution boxes serve three essential functions in any electrical installation: Safe installation requires corrosion-resistant materials, adequate internal cable space, and quality wiring throughout. A unit that lacks corrosion protection fails within months in humid or chemically aggressive. Schneider Electric aims to achieve Net Zero status by 2050 through supply chain partnerships, lower impact materials, and circularity via our ongoing “Use Better, Use Longer, Use Again” campaign to extend product lifetimes and recyclability.
