

Price List for China-Africa Mesh Cable Trays

AI Overview

Mesh cable trays from China to Africa typically range from \$10 to \$50 per meter depending on material, size, and finish, with factory-direct and OEM options available for bulk orders.

Overview of Mesh Cable Trays Mesh cable trays are used to support and protect electrical cables in industrial and commercial installations. They are available in steel, aluminum, and fiberglass, each offering different benefits: steel provides strength and durability, aluminum is lightweight and corrosion-resistant, and fiberglass is non-conductive for electrical insulation purposes. Common types include wire mesh trays, ladder trays, solid-bottom trays, and perforated trays, with wire mesh trays being lightweight and offering excellent ventilation.

Pricing from China Suppliers on platforms like Alibaba and Made-in-China offer wire mesh cable trays starting around \$10–\$20 per meter for standard sizes such as 50x100mm or 150x200mm, with CE-certified steel trays and options for galvanized or powder-coated finishes. Prices increase for stainless steel (SS 304/316) trays, custom dimensions, or heavy-duty designs, which can reach \$40–\$50 per meter. Factory-direct or OEM orders often provide volume discounts, making bulk purchases more cost-effective.

Suppliers and Options in Africa African distributors and manufacturers, such as Hutaib Electricals, provide locally available mesh cable trays with finishes including GI hot-dip, pre-galvanized, powder-coated, and stainless steel (SS 202/304/316). Local suppliers can reduce shipping costs and lead times, and they often offer custom sizes from 40mm to 1000mm width to suit specific installation requirements. Prices in Africa may be slightly higher than direct imports from China due to shipping and import duties, but local sourcing ensures faster delivery and support.

Cost Considerations When sourcing mesh cable trays between China and Afr...
