

Price of Aluminum Alloy Fiber Optic Splice Box

AI Overview

Aluminum alloy fiber optic splice boxes typically range from \$50 to \$500 per unit, depending on core capacity, ports, and supplier. Overview Aluminum alloy fiber optic splice boxes are used to protect, splice, and manage fiber optic cables in outdoor and indoor environments. They are valued for their high mechanical strength, corrosion resistance, airtight sealing, and long service life of up to 25 years. These boxes are suitable for pole, tower, aerial, buried, or manhole installations and can accommodate various cable types such as OPGW and ADSS. Factors Affecting Price

Core Capacity: Boxes can range from small units handling 8–24 fibers to large enclosures supporting 192 fibers or more. Higher core capacity generally increases the price.

Number of Ports: More ports for input/output connections increase complexity and cost.

Installation Type: Pole-mounted, tower-mounted, or underground models may have different pricing due to design and sealing requirements.

Supplier and Order Quantity: Prices vary between manufacturers and distributors. Bulk orders often reduce per-unit cost. Suppliers like Alibaba and Arnold Cable offer factory or quotation-based pricing, requiring direct contact for exact figures.

Typical Price Range

Small to medium splice boxes (up to 48 cores): Approximately \$50–\$150 per unit.

Large splice boxes (96–192 cores, multiple ports): Approximately \$200–\$500 per unit.

Custom or specialized models may exceed this range depending on features like IP65 waterproofing, reinforced aluminum alloy, or additional splice trays.

Purchasing Tips

Request a quote from multiple suppliers to compare prices and shipping costs. Check specifications such as fiber core capacity, port configuration, and environmental protection rating. Consider warranty and service: Long-term reliability is critical for outdoor installations. By understanding these factors, you can select a...
