

# Price of electrical distribution boxes for installation workers

## AI Overview

The installation price of electrical distribution boxes typically ranges from \$70 to \$1,800 or more, depending on type, capacity, materials, and labor complexity.

**Residential Distribution Boxes** For standard residential installations, total costs including the box, breakers, wiring, and professional installation generally range from \$450 to \$1,500 for typical 100–125 amp services, with simpler single-gang plastic boxes starting around \$70–\$120 and mid-range metal two-gang boxes costing \$160–\$260. Labor is often the largest variable, influenced by accessibility, wiring complexity, and local rates, with professional installation for a standard upgrade running \$1,300–\$1,800. Outdoor or weatherproof boxes, as well as units with AFCI/GFCI protection, can increase costs to \$350–\$560.

**Commercial and Industrial Distribution Boxes** Commercial and industrial units are more expensive due to higher capacity, enhanced durability, and advanced control systems. Prices can range from \$1,000 to several thousand dollars, depending on amperage, number of circuits, material (e.g., stainless steel vs. ABS plastic), and integrated features like surge protection or smart monitoring. Complex installations may involve weeks of labor and additional permit fees, especially for retrofits or large-scale projects.

**Factors Affecting Installation Costs**

- Material and Construction:** Plastic enclosures are cheaper, while powder-coated steel or stainless steel boxes are more durable and costly.
- Capacity and Features:** Higher amperage, more circuits, and smart monitoring systems increase the price.
- Labor Complexity:** Installation in hard-to-access locations, retrofits, or multi-story buildings can raise labor costs significantly.
- Environmental Rating:** Outdoor-rated or weatherproof boxes carry premium pricing.
- Compliance and Certification:** UL, CE, or IEC certifications may affect both material and labor costs ....
