

Price of power distribution boxes for substation computer rooms

AI Overview

Power distribution boxes for substation computer rooms typically range from around \$6,800 per unit, with prices varying based on voltage, capacity, and customization options. Pricing Overview Substation boxes, also known as electrical enclosures or kiosks, are designed to house critical electrical components for safe and efficient power distribution. For medium-voltage applications (1kV–35kV), prices for standard units start at approximately \$6,832.8 per unit for small-scale orders, with larger or customized units costing more depending on specifications and OEM requirements (Alibaba.com). Wholesale pricing can be lower per unit when ordering in bulk, and suppliers often provide discounts for larger quantities (Made-in-China.com). Factors Affecting Price Voltage Rating: Low-voltage (below 1kV) boxes for computer rooms and building distribution are generally less expensive than medium- or high-voltage enclosures used in utility substations. Capacity: Units range from 50kVA to 500kVA, with higher-capacity boxes costing more due to larger transformers, busbars, and circuit breakers. Customization: Options such as modular designs, IP-rated enclosures, custom busbar layouts, cable entry modifications, and OEM branding can increase the price. Material and Build Quality: Enclosures made from durable metals, with waterproofing or corrosion resistance, are priced higher than standard PVC or basic metallic boxes. Supplier and Shipping: Prices vary by manufacturer, location, and shipping costs. Some suppliers offer next-day shipping for stock items, while custom orders may take longer and cost more. Supplier Options Alibaba.com: Offers verified substation boxes with prices starting around \$6,832.8 per unit, suitable for commercial and industrial applications. Made-in-China.com: Provides wholesale options with flexible pricing based on order volume and customization. Global Sourc...
