

Price quote for large-span low-voltage cable trays

AI Overview

Large-span low-voltage cable trays typically range from \$50 to \$250 per meter, depending on material, size, and load capacity.

Price Range and Factors

The cost of large-span low-voltage cable trays varies widely based on material, dimensions, and environmental protection. Common materials include aluminum, galvanized steel, stainless steel, and fiberglass-reinforced plastic (FRP), with aluminum and FRP generally being lighter and corrosion-resistant, while steel offers higher load capacity.

. For example, standard ladder-type trays for heavy loads can support 30–40 kg per 1.5 meters, with prices increasing for higher load ratings or specialized coatings.

.Aluminum trays: Lightweight, corrosion-resistant, ideal for long spans; prices typically range \$80–\$200 per meter.

.Galvanized steel trays: Stronger, suitable for industrial environments; prices range \$60–\$180 per meter.

.FRP trays: Non-conductive, corrosion-resistant, often used in chemical or outdoor environments; prices range \$100–\$250 per meter.

.Additional Cost Considerations

Tray Width and Span: Wider trays or those designed for long spans increase material usage and cost.

Load Capacity: Trays rated for heavier cables or multiple layers of cabling are more expensive.

Coatings and Fire Ratings: Zinc coating, powder coating, or UL94V-0 fire-rated materials add to the price.

.Installation Features: Modular designs, tool-free assembly, and integrated fixing systems can reduce labor costs but may slightly increase unit price.

.Supplier Options

McMaster-Carr offers a wide selection of cable trays with same-day delivery, suitable for commercial and industrial projects.

.Grainger provides aluminum ladder trays for long-span installations, emphasizing airflow and easy modifications.

.Alibaba and other suppliers offer customizable low-voltage trays with waterproof and corrosion-resistant options.

. In summary, expect...
