

# Rack DC Power Distribution Unit 42U FOB Price

## AI Overview

The FOB price for a 42U rack-mounted DC PDU typically starts around \$10 per unit for wholesale orders, depending on specifications and supplier. Price Overview Alibaba listings show 42U rack server cabinet PDUs starting at approximately \$10 per unit, available for purchase in quantities as low as one, which is indicative of FOB pricing for bulk orders. Prices vary based on features such as intelligent monitoring, metered output, SNMP support, and amperage/voltage ratings. Higher-end PDUs with smart features or higher current capacity can cost significantly more. Supplier Options Orient Tech Limited manufactures 42U PDUs with options for 32A 230V and other configurations, offering both standard and intelligent PDUs suitable for data centers. Dell offers branded PDUs for 42U racks, such as the 100V 16A model, which may be priced higher due to brand and warranty considerations. Sysracks and Amazon provide a range of 42U server racks with compatible PDUs, allowing buyers to select based on depth, amperage, and monitoring features. Considerations for FOB Pricing Quantity: Bulk orders typically reduce the per-unit FOB cost. Specifications: Higher amperage, smart monitoring, or IP-rated enclosures increase the price. Shipping Port: FOB pricing depends on the port of origin; most Chinese suppliers quote FOB from ports like Shenzhen or Shanghai. Customization: Custom PDUs with specific connectors or voltage ratings may incur additional costs. Recommendation For budgeting purposes, expect a baseline FOB price of \$10–\$50 per unit for standard 42U DC PDUs, with smart or high-capacity models potentially exceeding \$100 per unit. Contact suppliers directly to confirm FOB terms, minimum order quantities, and shipping options to get precise pricing.
