

Railway DC Distribution Box

Overview

This bundle includes a 48W DIN-rail power supply and a 12-way DC distribution module, designed for industrial control cabinets, telecom, and automation projects. It provides regulated 12V DC output for powering multiple devices from a single source. HV changeover units, multipole rotary scissor switches, 2, 3 and 4 position assemblies, suitable for all UIC voltages, off-load adjustment of electrical configurations. For all railway vehicles used in cross-border rail traffic that are equipped with a train line. Complete Power Bundle Includes a 48W (12V 4A). Wherever DC substations are found, Sécheron DC electrification equipment helps deliver power and provide protection for people and property in the railway industry. Our ESTRA-MIU amplifier measures high DC currents in transit systems, ensuring. We offer a Consulting and Engineering service to support the client throughout the entire lifecycle of their project, solving any technical challenges. At Delvalle, we don't just design solutions, we also manufacture them. The power blocks are finger-safe on all.
