

S800E Optical Module

Overview

Huawei OptiXstar S800E is a miniature Optical Network Unit (ONU) that can be inserted into the Small Form-Factor Pluggable (SFP) port of a camera or Access Point (AP) to provide 10-Gigabit-capable Symmetric Passive Optical Network (XGS-PON) access, meeting video or wireless backhaul. Huawei OptiXstar S800E is a miniature Optical Network Unit (ONU) that can be inserted into the Small Form-Factor Pluggable (SFP) port of a camera or Access Point (AP) to provide 10-Gigabit-capable Symmetric Passive Optical Network (XGS-PON) access, meeting video or wireless backhaul. Huawei OptiXstar S800E is a miniature Optical Network Unit (ONU) that can be inserted into the Small Form-Factor Pluggable (SFP) port of a camera or Access Point (AP) to provide 10-Gigabit-capable Symmetric Passive Optical Network (XGS-PON) access, meeting video or wireless backhaul requirements. device to provide XGS-PON access for the device to meet the requirements of video backhaul or wireless backhaul. This allows a standard router or switch to function as an XGS-PON client terminal. The maximum receive. at communicates with parent controllers over industry-standard field buses. Identifying the optimal optixstar s800e involves comparing offerings based on key supplier attributes and product specifications.
