

Sealed distribution box for outdoor use

AI Overview

Sealed outdoor distribution boxes protect electrical connections from water, dust, and UV exposure, with IP65–IP67 ratings ensuring reliable performance in harsh environments.

Key Features

Weatherproof Ratings: Look for boxes rated IP65, IP66, or IP67, which provide protection against dust, rain, and temporary submersion in water. IP65 is suitable for general outdoor use, IP66 for high-pressure water exposure, and IP67 for flood-prone areas or poolside installations.

Materials: Common materials include ABS plastic, polycarbonate, fiberglass, and stainless steel. ABS and polycarbonate are lightweight, UV-stabilized, and impact-resistant, ideal for residential or garden setups. Metal enclosures like stainless steel or aluminum offer superior durability and security for industrial or high-traffic areas.

Sealing and Protection: High-quality gaskets, precision-molded latches, and vacuum-tight seals prevent water and dust ingress. Some models include lockable covers for added security and transparent lids for monitoring internal components without opening the box.

Mounting and Access: Options include wall-mounted, pole-mounted, or surface-mounted enclosures. Many boxes support DIN rail installation for breakers, relays, or terminals, and feature multiple cable entry ports with rubber gaskets or PG/M-thread glands for strain relief.

Ventilation and Heat Management: For electronics generating heat, some boxes include vented designs or integrated cooling fans to maintain safe operating temperatures while keeping the enclosure weatherproof.

Popular Applications

Residential and Garden: Protect timers, power strips, and outdoor lighting systems.

RV and Marine: Secure NEMA-rated power inlets and circuit breakers.

Solar and Renewable Energy: House controllers, inverters, and junctions.

Industrial Automation: Mount relays, terminals, and modular breakers in harsh environments.

Agriculture and Remote Sites: Safeguard electrical connections from rain, dust, and UV exposure.
