

Shielded Cable Tray Quotation

AI Overview

To obtain a quotation for shielded cable trays, you need to specify tray type, dimensions, material, surface treatment, and installation requirements to suppliers like Eaton or MP Husky. Steps to Request a Quote

Select the Tray Type Shielded cable trays are typically fully enclosed or perforated with covers to provide EMI protection and prevent debris ingress. Perforated shielded trays offer ventilation while maintaining cable safety, suitable for control and power cables.

Specify Dimensions and Load Requirements Define tray width, side height, and bending radius based on cable quantity, segregation needs, and future expansion. Consider the support method (wall, ceiling, or trapeze) and span to ensure structural integrity.

Choose Material and Surface Treatment Common materials include galvanized steel, stainless steel, or aluminum. Coatings like hot-dip galvanization, powder coating, or pre-galvanized finishes affect durability and cost. Stainless steel is ideal for harsh environments, while powder-coated steel suits indoor applications.

Include Accessories and Fittings Ensure the quotation accounts for covers, dividers, bonding/grounding jumpers, splice plates, and supports. These components are essential for a complete shielded cable tray system.

Submit a Request to Suppliers

- Eaton:** Complete their online RFQ form specifying country, tray type, and project details.
- MP Husky:** Provide project information through their quote request page; they will return a detailed estimate.

Consider Pricing Factors Cable tray costs vary from \$2 to \$25 per meter depending on material, type, size, coating, and order quantity. Bulk orders can reduce costs by 20–40%. Additional costs include shipping, installation, and labor.

Tips for Accurate Quotation

- Provide a Bill of Materials (BOM)** with cable types, lengths, and quantities.
- Specify environmental conditions** (indoor, outdoor, corrosive) to select the appropriate material and coating.
- Include installation complexity** and any special requirements like EMI shielding or high-temperature res...
