

Stainless Steel Cable Trays from Norway

AI Overview

Norwegian stainless steel cable trays are durable, corrosion-resistant, customizable, and designed for efficient cable management in demanding environments. Material and Durability Norwegian stainless steel cable trays are typically made from AISI Type 304 or 316 stainless steel, providing excellent resistance to corrosion, especially in offshore, marine, and industrial environments. The use of high-quality stainless steel ensures long-term durability and minimal maintenance, making them suitable for both indoor and outdoor applications. Design and Construction These cable trays feature rounded edges and smooth surfaces to protect cables and tubing from damage. They are available in various heights, widths, and lengths, allowing flexibility in installation and load capacity management. Ladder-type trays consist of side rails with welded rungs, spaced typically at 6, 9, or 12 inches, capable of supporting concentrated loads up to 200 lbs per rung with a safety factor of 1.5. Slot patterns and perforations allow for efficient cable positioning, ventilation, and easy attachment of cable ties or tubing clamps. Modularity and Customization Norwegian stainless steel cable trays are highly modular, with a wide range of fittings, brackets, and splice plates to accommodate complex routing and structural requirements. Custom sizes and configurations can be produced to meet specific project needs, including compact trays for lighter cabling or heavy-duty trays for large-scale installations. Some designs include patented lock systems for secure yet accessible cable management. Installation and Maintenance These trays are designed for fast and easy installation, often requiring minimal tools and hardware, such as M8 bolts and standard wrenches. Fewer fasteners and parts reduce assembly time, and the trays can be cut, bent, or shaped on-site to fit unique installation conditions. Open or perforated designs also help prevent overheating and allow for straightforward maintenance. Applications Norwegian stainless steel cable trays are suitable for ind...
