

Standard Price of Three-Level Distribution Box for Construction Sites

AI Overview

The typical price of a three-level distribution box for construction sites ranges from approximately \$150 to \$500 per unit, depending on specifications, materials, and features.

Price Range and Factors

The cost of a three-level distribution box varies based on several factors:

- Voltage and Current Rating:** Boxes designed for 380V three-phase supply with main switches rated 63A–100A are common, and higher current ratings generally increase the price.
- Material and Build Quality:** Steel or powder-coated metal boxes are more durable and slightly more expensive than reinforced plastic models. High-strength plastic with metal frames offers a balance of durability and mobility.
- Ingress Protection (IP) Rating:** IP44 boxes for basic splash resistance are cheaper, while IP65/IP67 waterproof and dust-tight models suitable for outdoor use cost more.
- Integrated Safety Components:** Inclusion of MCBs, RCDs, or MCCBs as main switches adds to the cost.
- Mobility and Accessories:** Movable boxes with wheels, protective covers, and multiple sockets for tools and lighting are priced higher due to convenience and safety features.
- Customization:** Custom socket layouts, branding, or special voltage requirements can increase the unit price.

Typical Market Examples

- Alibaba and Taobao Listings:** Three-level distribution boxes with standard sockets, copper wiring, and basic safety features are described as affordable and cost-effective, generally falling in the \$150–\$300 range for standard models.
- EPS EM-3 Metalclad Boxes:** Higher-end metal boxes suitable for MCCB main switches and multiple rows may cost \$300–\$500, depending on size and configuration.
- Portable and Modular Boxes:** Lightweight, modular boxes with IP65/IP67 ratings and integrated MCBs or RCDs are priced around \$200–\$400, reflecting enhanced safety and mobility.

Summary

For construction site planning, a standard three-level distribution box can...
