

Standards for Protection Requirements of In-Service Optical Cables in Ducts

Overview

100 describes characteristics, construction, test methods, and performance criteria of optical fibre cables installed by pulling method for duct and tunnel application. Note that Recommendation ITU-T L. 0, in February. The Code of Federal Regulations (CFR) is the official legal print publication containing the codification of the general and permanent rules published in the Federal Register by the departments and agencies of the Federal Government. 35 was prepared by ITU-T Study Group 6 (1997-2000) and was approved under the WTSC Resolution No. 1 procedure on the 9th of October 1998. Installation methods covered by this document include underground ducts, trenchless technique, blowing in microducts, aerial installation. comprising all national electrotechnical committees (IEC National Committees).
