

Supply of Galvanized Ladder Cable Trays

AI Overview

Galvanized ladder-type cable trays, including pre-galvanized and hot-dipped galvanized options, are in stock and suitable for industrial and commercial applications. Overview Ladder-type cable trays consist of two parallel side rails connected by rungs, providing excellent support, ventilation, and ease of maintenance for power and communication cables. They are widely used in industrial, commercial, and infrastructure projects due to their high load-bearing capacity, cost-effectiveness, and adaptability. Material and Corrosion Protection Hot-Dipped Galvanized (HDG) Steel: Coated with zinc through immersion, offering superior corrosion resistance, ideal for outdoor and industrial environments exposed to moisture or harsh weather. Pre-Galvanized Steel: Provides corrosion protection suitable for indoor and less demanding environments. Galvanized Iron (GI) Sheets: Zinc-coated to prevent rust, commonly used in structural applications. Features and Benefits Open Ladder Design: Ensures efficient heat dissipation, preventing cable overheating and extending cable life. Ease of Maintenance: Open access allows for easy cable additions, modifications, and troubleshooting. High Load Capacity: Supports heavy power cables over long spans. Flexible and Expandable: Can be adapted for future cable routing needs. Compliance: Many trays meet UL and NEMA VE-1 standards, ensuring safety and reliability. Sizes and Accessories Standard lengths: 3 meters, with options for 6 meters in some manufacturers. Widths: Typically range from 50mm to 600mm, depending on project requirements. Accessories: Include couplers, bends (45° and 90°), tee bends, crossovers, and risers for seamless installation. Installation: Rungs are often fastened using swaging or robotic welding, providing structural strength and electrical continuity. Applications Industrial plants, commercial buildings, hospitals, and large infrastructure projects. Suitable for high-density cabling environments and areas requiring corrosion-resistant solutions.
