

Supply of optical cable terminal box price

AI Overview

On-site optical cable terminal boxes typically range from \$10 to \$150 per unit, depending on capacity, type, and features.

Price Range and Factors

The cost of an optical cable terminal box varies based on several factors:

- Port Capacity:** Small 2–4 port FTTH terminal boxes are generally priced around \$10–\$30, while larger 12–16 port boxes can cost \$50–\$150 depending on the manufacturer and material used.
- Indoor vs Outdoor:** Outdoor boxes with IP65–IP67 ratings for dust and water protection are more expensive than indoor wall-mounted units.
- Material and Durability:** Boxes made from flame-retardant PC or ABS materials with high mechanical strength and environmental stability are priced higher due to better protection and longevity.
- Connector Types:** Units supporting multiple adapter types (SC, LC, FC) or pre-installed PLC splitters may increase the price.
- Supplier and Purchase Volume:** Wholesale or factory-direct purchases from China can reduce costs significantly, especially for bulk orders, while retail platforms like Amazon may have higher per-unit prices for small quantities.

Typical Examples

- Small Indoor FTTH Terminal Box:** 2–4 ports, wall-mounted, IP54, priced around \$10–\$25 per unit.
- Medium Capacity Box:** 8–12 ports, indoor/outdoor, IP65, flame-retardant material, priced \$40–\$80 per unit.
- High-Density Outdoor Box:** 16–24 ports, IP65–IP67, suitable for pole or wall mounting, priced \$100–\$150 per unit.

Purchasing Tips

Compare multiple suppliers to ensure competitive pricing and reliability. Consider the installation environment (indoor/outdoor) and required port capacity before selecting a model. Check for pre-installed splitters or adapters if needed for your network setup, as this can affect both cost and installation time. For large-scale deployments, bulk orders from manufacturers can significantly reduce per-unit costs. By considering these factors, you can select an optical cable terminal box that balances cost, durability, and network requirements.
