

TP-Link PoE Switch Power

AI Overview

TP-Link offers several PoE powered switches, such as the TL-SG1005P and TL-SG105PE, which provide reliable power and data connectivity for devices like IP cameras and access points.

TP-Link TL-SG1005P Ports: 5 ports total, with 4 PoE+ ports (802.3at/af) providing up to 30W per port and a total PoE power budget of 65W. Features: Plug and play setup with no software installation required. Supports advanced features like QoS (Quality of Service) for prioritizing traffic, ensuring high-quality video or voice data transmission. Durable metal casing suitable for various environments and a fanless design for quiet operation. Automatic detection and rebooting of powered devices (PD) when they go offline, ensuring stable operation without manual intervention. Applications: Ideal for deploying IP cameras and other PoE devices in large areas, with an extended PoE transmission distance of up to 820 feet.

TP-Link TL-SG105PE Ports: 5 ports total, with 4 PoE+ ports supporting up to 30W each and a total power budget of 65W. Compatibility: Works with PoE devices like IP cameras, access points, and IP phones, as well as non-PoE devices such as PCs and printers. Management Features: Offers network monitoring, traffic prioritization, and enhanced QoS through a web-based user interface, allowing for better management of network traffic and performance. Automatic Power Management: Automatically detects and manages power for connected devices, ensuring high-priority devices receive power even when total consumption exceeds limits.

Both models are excellent choices for users looking to implement PoE solutions in their networking setups, providing flexibility and ease of use for various applications.
