AI Overview

Prysmian Group is the manufacturer known for producing the longest optical cables, including high-capacity submarine cables connecting continents. Prysmian Group, headquartered in Italy, is recognized as the largest fiber-optic cable manufacturer in the world and a leader in long-distance optical cable solutions. The company specializes in submarine cables capable of spanning thousands of kilometers, supporting data transmission capacities exceeding 200 Tbps, which makes them ideal for intercontinental and long-haul networks. Their cables are engineered for high tensile strength and low attenuation, ensuring reliable performance over extreme distances. Key Capabilities Submarine Cable Networks: Prysmian has extensive experience in laying undersea cables that connect continents, forming the backbone of global internet and cloud infrastructure. High-Capacity Transmission: Their optical fibers support ultra-high bandwidth, suitable for 5G, cloud computing, and AI-driven data networks. Global Reach: With operations in over 50 countries and 108 manufacturing plants, Prysmian can deliver turnkey solutions for both energy and telecom sectors. Innovation: The company invests in bend-optimized fibers and sustainable production methods, reducing environmental impact while maintaining performance.
