

Vertical Cable Tray Fixing Clamps

Overview

Fixing clamp that fits both FOE cable ladders and FTE cable trays. Used for vertical or horizontal installations. Available in SS or FRP material. MP Husky Cable Tray support is engineered to provide rigid structural support and control for a variety of industrial and commercial installations. Since cable tray support is used in a wide variety of applications, and under varying conditions, it is important that you gain an understanding of. Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. The GRKHV wire mesh tray mounting clamp offers extensive options for realizing various cable routing options in addition to combining horizontal and vertical clamp fastening. Product Clamp fastening to steel beams is an efficient solution for using the existing "infrastructure" without having to carry. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Place one round washer on each hanger rod and then lift tray section so that the threaded rod runs through the two holes in the clamp (SC). With our many years of experience, we are one of the leading manufacturers in this field.
