

What are the criteria for partitioning the Barbados domain

AI Overview

Barbados domains (.bb and .co.bb) require local presence, proper documentation, and compliance with specific registration rules to ensure legitimacy and trust.

Eligibility and Local Presence To register a .bb domain, the registrant must either be a resident of Barbados or a company registered and operating in Barbados. International entities may sometimes register if they have activities in Barbados, but local presence is generally required for most subdomains, especially .co.bb, which is strictly for businesses incorporated in Barbados. Government domains are restricted to official Barbadian organizations.

Documentation Requirements

- Companies:** Must provide a copy of the Barbados company registration certificate, a local address, and a phone number. For .co.bb, both a company registration number and a VAT number are mandatory.
- Individuals:** Must provide local identification, address, and phone number.

A signed application form is required for all registrations, and administrative contacts must be legal entities for business domains.

Domain Name Specifications

- Length:** Domain names must be between 3 and 63 characters.
- Characters:** Only Latin characters are allowed for .co.bb; .bb supports Internationalized Domain Names (IDNs) for non-ASCII characters.

Restrictions: Domains cannot be defamatory, obscene, offensive, or infringe on third-party trademarks.

Registration and Renewal

- Term:** Domains are licensed for one year, with annual renewal required. Some .bb domains allow two-year registration.
- Grace Periods:** Late renewals may have a grace period (typically 60 days for .co.bb), after which the domain may be suspended or deleted.

Transfer Security: Transfers require verification via telephone and physical proof of identification to prevent unauthorized changes.
