

What s a suitable price for selling optical cables

AI Overview

Fiber optic cables typically sell for \$0.09 to \$6 per foot depending on type, strand count, and construction, with pre-terminated or specialized cables commanding higher prices.

Pricing Overview

The price of optical cables varies widely based on several factors:

- Cable Type and Strand Count:** Single-mode fiber (OS2) generally costs \$0.09 to \$1.52 per foot, while multimode fiber (OM3/OM4) ranges from \$1.50 to \$6 per foot. Higher strand counts increase the price proportionally, e.g., a 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1 per foot.
- Construction and Rating:** Indoor riser-rated cables are cheaper than plenum-rated cables. Armored cables for harsh environments or direct burial applications can cost \$0.50 to \$5 per foot.
- Pre-Terminated or Patch Cables:** Factory-terminated cables with connectors are more expensive due to labor and materials, often adding 20–30% to the base cost.
- Material Quality:** Glass fiber cores are more expensive than plastic alternatives but provide superior performance for high-speed or long-distance applications.
- Market Considerations**
 - Wholesale vs Retail:** Bulk purchases typically reduce the per-foot cost, while retail sales to end-users are higher due to packaging, shipping, and platform fees.
 - Selling Platforms:** B2B marketplaces like Tradewheel, e-commerce platforms such as Amazon, eBay, and Walmart, and specialized distributors are effective channels for selling fiber optic cables.
 - Buyer Expectations:** Customers often expect detailed specifications, including fiber type, strand count, jacket material, and spool length. Providing this information can justify higher pricing.
- Recommended Pricing Strategy**
 - For standard single-mode cables, a selling price of \$0.10–\$1.50 per foot is reasonable.
 - For multimode or high-strand-count cables, consider \$1.50–\$6 per foot.
 - For pre-terminated or armored cables, adjust prices upw...
