

What types of fiber optic connectors are used in drilling

Overview

ST and SC interface are two types of fiber optic connectors. For the 10Base-F connection, the connector is usually ST type; for 100Base-FX, the connector is SC type in most cases. It begins with extremely high pressures and temperatures (HPHT). The connectors in these applications must survive HPHT and corrosive environments and still deliver outstanding. What types of connectors are used in downhole drilling rigs?

The environment in downhole drilling rigs is harsh. They must be compact to fit into restricted spaces, handle electrical power, and provide signal interconnects for sensors and other devices. In some. Fiber optics (FO) technology is finding new uses in subsea applications.
